Team Member Name	P.Revanth	

1. Abstract

(Summarize the project idea, problem background, and proposed solution. Not more than 250 words.)

This project aims to develop an Online Quiz Management System that allows users to take quizzes based on different topics such as Java, JavaScript, and DBMS. The system provides a simple and user-friendly interface where users can select a category, answer multiple-choice questions, and view their scores instantly. The system includes an admin module to manage quiz questions, including adding, updating, and deleting questions stored in a database. Questions are displayed randomly for each quiz attempt to improve user experience.

The project is developed using Java (Spring Boot) for backend, HTML, CSS, and JavaScript for frontend, and MySQL for database management. This system helps in evaluating knowledge effectively and demonstrates concepts like database connectivity, APIs, and dynamic web design.

2. Module Mapping

(Provide details of how modules are divided among team members.)

Module Name	Assigned Roll Number(s)	Signature
Frontend UI + Admin Panel	2520030595	
Backend + Database	2520030292	

3. Module Details

(Explain the responsibility of each student concerning their assigned module.)

The project is developed by two team members with equal contribution. One member is responsible for designing the frontend user interface, including quiz pages, category selection, and admin panel for managing questions. The other member handles backend development using Java and Spring Boot, including API creation, business logic, and database management using MySQL. Both members collaborate in testing and integrating the modules to ensure proper functionality of the system.

Koneru Lakshmaiah Education Foundation

(Deemed to be University estd. u/s. 3 of the UGC Act, 1956)

Off-Campus: Bachupally-Gandimaisamma Road, Bowrampet, Hyderabad, Telangana - 500 043.

Phone No: 7815926816, www.klh.edu.in

4. Frameworks / Platforms / Software Used

(List the frameworks, libraries, platforms, or tools you plan to use.)

Frontend: HTML, CSS, JavaScript

Backend: Java, Spring Boot

Database: MySQL

Frameworks/Libraries: Spring Boot, Hibernate (JPA)

Tools/Platforms: Visual Studio Code
